Re: INSTALLATION OF WELLS

Dear Mr. Gartland:

On behalf of the Board of Governors of Timuquana Country Club, I am granting your Environmental Division permission to install three shallow wells on Timuquana Country Club property as part of your study of ground water flow, near your waste water treatment plant.

As we discussed, these wells will be located on the golf course in the rough nearest the tree line on holes number 10, 11, and 12. As you may remember from your visit to Timuquana, it was discussed that these wells, once installed, are not to disrupt golf play in any manner, nor detract from the natural beauty of the surroundings. When installing, maintaining and/or monitoring these facilities, your personnel shall notify the Club Manager and/or the Golf Superintendent with 48 hours advance notice.

You may also construct maintenance paths which will be cleared and maintained under the direction of our Golf Course Superintendent, Tom Prescott. These paths should be inconspicuous and limited to travel only to and from your storage area to each of the three wells.

We look forward to cooperating with you and your staff, as well as other personnel, regarding this project and our combined efforts in using your treatment plant's effluent waste water for the irrigation of our golf course. Continued cooperative efforts from the Navy and Timuquana Country Club will not only benefit both parties but the entire community.

Please do not hesitate to call if you have any further questions.

Sincerely,

Greg Larson  
General Manager, Timuquana Country Club  
By direction of the Board of Governors
